

Teacher / Parent

EDUCATOR

1 Register & wait for approval

Go to gnosiscore.org/register, choose **Teacher / Parent**, fill in your details. Admin will approve your account — you'll receive an email once approved.

2 Upload your study materials

From the **Documents** page, upload PDFs or images (max **4 MB** each). The system converts them to searchable text automatically. Wait for status to show **Ready**.

PDF & images supported

3 Generate questions

Go to **Generate**, select your documents, enter a topic, choose difficulty (Easy / Medium / Hard) and number of questions. Questions are generated strictly from your uploaded content — no hallucinations.

≤20 questions: instant · >20: needs admin approval

4 Review & approve questions

All generated questions land in **Review**. Read each question, edit if needed, then click **Approve** or **Reject**. Only approved questions enter your question bank.

5 Build a test

Go to **Test Builder**, pick questions from your bank, set a title and configure options. Save as draft or publish immediately.

6 Assign to students

Open the test, click **Assign**, enter student email addresses (one per line), optionally set a due date. Students receive an email with a direct link.

Email notification sent automatically

7 Track performance

View per-test and per-student analytics from the **Analytics** page. Export results as CSV anytime.

Student

STUDENT

1 Register your account

Go to gnosiscore.org/register, choose **Student**, enter your name, email and a password. Your account is activated immediately — no waiting for approval.

2 Log in

Go to gnosiscore.org/login. Enter your email and click **Send OTP** — a 6-digit code is emailed to you. Enter it to sign in. Alternatively use your password.

Check spam if code doesn't arrive

3 Open an assigned test

When a teacher assigns you a test, you'll receive an email with a **Take Test** button. Click it — or find the test in your **Student Dashboard** under *Assigned Tests*.

Email includes the due date

4 Answer the questions

Read each question and click the option you think is correct (A, B, C or D). Use the **Previous / Next** buttons to navigate. You can change any answer before submitting.

5 Submit & see your score

Click **Submit Test** when done. Your score appears immediately along with correct answers and explanations for every question — great for learning from mistakes.

6 Review past tests

All completed tests and scores are saved in your dashboard. You can revisit any result at any time to study the explanations again.
